- And more

But that's just the beginning. Read on for more about our dental benefits.

Comprehensive dental coverage is included with many of our Medicare Advantage plans. This means we offer plans with services that Original Medicare doesn't cover, such as:

*Some dental services can have limits when it comes to coverage. This isn't a complete list of those services, but you can find out if a different dental service is covered under your Healthfirst Medicare Plan by reviewing your Healthfirst Medicare Dental Benefit Limitations and Exclusions Guide at [HFMedicareMaterials.org](https://www.HFMedicareMaterials.org).

Dental Limitations and Exclusions

Certain services may require prior authorization.

Services may be reviewed for medical necessity. Please see the Healthfirst Medicare Dental Benefit Limitations and Exclusions Guide at [HFMedicareMaterials.org](https://www.HFMedicareMaterials.org) for additional details on covered dental services, including frequencies, limitations, and exclusions.

Healthfirst encourages you to discuss all treatment options with your dentist prior to services being rendered. If covered procedures are performed by an in-network dentist, you may only be responsible for copay/coinsurance (specified cost-sharing). Otherwise, you may have to pay the full cost.

The following shows some (not all) of the exclusions and limitations that could apply. Please refer to the Healthfirst Medicare Dental Benefit Limitations and Exclusions Guide at [HFMedicareMaterials.org](https://www.HFMedicareMaterials.org) or call us to find out if a dental service is covered.

Generally, plans do NOT cover:

- Services provided by a non-participating dentist or in a hospital setting.
- General anesthesia or IV sedation for procedures other than extensive and/or complex surgical procedures such as impacted wisdom teeth, surgical root recovery from maxillary antrum, surgical exposure of impacted or unerupted cuspids, or radical excision of lesions in excess of 1.25cm or certain medical conditions.
- Any dental procedures done primarily for cosmetic reasons or to treat congenital or developmental malformations.
- Replacement of lost or broken dentures less than five years of age.
- Restorations (including crowns, bridges, inlays, and onlays) when acceptable results can be achieved with less costly methods or materials.
