INTRODUCTION

We are pleased to provide the 2021 *Healthfirst Child Health Plus Formulary* as a useful reference and informational tool. This document can assist medical providers in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The document is reflective of current medical practice as of the date of review.

The information contained in this document and its appendices is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This document is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the document is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at <https://www.ahrq.gov/gam/>, on the websites listed under each therapeutic class and on the sites listed in the Websites section of this publication.

PREFACE

The *Healthfirst Child Health Plus Formulary* is a list of drugs which are covered by our plan, as well as any restrictions. These are what we call **preferred drugs**. This list includes brand-name drugs and generic drugs. These drugs are dispensed through participating pharmacies. It's important to know that the formulary usually does not include a brand-name drug when the same medicine can be provided as a generic drug. The drug formulary list may change at any time.

The document is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action. Products are listed by generic name with brand name for reference only. Unless the cited drug is available as an injectable or an exception is specifically noted, generally, all applicable dosage forms and strengths of the drug cited are included in the document.

Drugs represented in this document may have varying cost to the plan member based on the plan's benefit structure. Generic medications typically are available at the lower cost, brand-name medications on the document will generally cost more than generics. Generics should be considered the first line of prescribing subject to applicable rules.

To learn more about which drugs are covered by Healthfirst, please call Member Services, Monday-Friday, 8 am-6 pm at 1-866-463-6743; TTY 1-888-542-3821 or visit our website at www.healthfirst.org to see if your drug is covered.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve safe and clinically effective drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

DRUG LIST PRODUCT DESCRIPTIONS

To assist in understanding which specific strengths and dosage forms on the document are covered, examples are noted below. The general principles shown in the examples can usually be extended to other entries in the document. Any exceptions are noted.

Listed products on the document generally include all strengths and dosage forms of the cited brand-name product.

pregabalin *Lyrica*
Oral capsules, oral solution and all strengths of Lyrica would be included in this listing.

When a strength or dosage form is specified, only the specified strength and dosage form is on the document. Other strengths/dosage forms, including injectable dosage forms of the reference product are not.

esomeprazole magnesium delayed-rel susp 2.5 mg, 5 mg, 10 mg *Nexium*
The oral suspension dosage form of Nexium is on the document. From this entry, the oral capsule cannot be assumed to be on the list unless there is a separate entry.

If the OTC and Prescription versions of the product are covered, then both are listed.

OTC *famotidine* *Pepcid AC*
famotidine *Pepcid*

Extended-release and delayed-release products require their own entry.

metformin *Glucophage*
The immediate-release product listing of Glucophage alone would not include the extended-release product Glucophage XR.

metformin ext-rel *Glucophage XR*
A separate entry for Glucophage XR confirms that the extended-release product is on the document.

Dosage forms on the document will be consistent with the category and use where listed.

nystatin
The above *nystatin* entry listed in the TOPICAL/DERMATOLOGY section is limited to the topical dosage forms. From this entry the oral formulations cannot be assumed to be on the list unless there is an entry for this product in the ANTI-INFECTIVES section of the document.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. **Boldface type** indicates generic availability. However, not all strengths or dosage forms of the generic name in boldface type may be generically available. In most instances, a brand-name drug for which a generic product becomes available will become non-formulary, with the generic product covered in its place, upon release of the generic product to the market. However, the document is subject to state specific regulations and rules regarding generic substitution and mandatory generic rules apply where appropriate.

Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration (FDA) for safety and effectiveness, and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug (bioequivalence). Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug (therapeutic equivalence).

PRIOR AUTHORIZATION CRITERIA

The plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from the plan before you fill your prescriptions. If you don't get approval, the plan may not cover the drug. To learn more about prior authorization requirements, please call Member Services, Monday-Friday, 8 am-6 pm at 1-866-463-6743 and one of our knowledgeable representatives will be ready to assist you.

STEP THERAPY CRITERIA

There are effective, lower-cost drugs that treat the same health condition as this drug. You may be required to try one or more of these other drugs before the plan will cover your drug. If you have already tried other drugs or your doctor thinks they are not right for you, please have your prescribing doctor call CVS Caremark for an override.

SPECIALTY PLAN DESIGN

Specialty Guideline Management (SGM)

SGM is our utilization management program that helps ensure appropriate utilization for specialty medication based on currently accepted evidence-based medicine guidelines. The utilization management program is available for all therapeutic areas dispensed by our specialty pharmacies. SGM is designed to help ensure safety and efficacy while preventing off-guideline utilization. Medications which may be included in the SGM program are identified in the document as "SGM" for your reference. Health care providers may call 1-800-238-7828 to initiate the prior authorization process.

PLAN DESIGN

The document represents a closed formulary plan design. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Step Therapy, Prior Authorization, Quantity Limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria. Log in to www.healthfirst.org to check coverage.
